DETAILED ACTION

Drawings

1. The drawings were received on June 28, 20004. These drawings are acceptable.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Su et al (U.S. Patent 6,625,161 B1).

Regarding to claim 1, Su discloses a method for scheduling packets in a router 17 of a packet-switched network having a plurality of service classes (Fig. 1 col. 3 lines 57-60, the traffic aggregate read on the service classes), the router including one queue 117 for each service class (Fig. 2 col. 4 lines 36-39), each queue storing packets to be

Art Unit: 2663

transmitted according to the associated service class (Fig.2 col. 4 lines 39-42), comprising measuring an average queue length for a particular queues (Fig. 3 col. 5 lines 17-22) and allocating bandwidth (reassign communication channels 115a-c) to each of the plurality of service classes according to the average queue length (Fig. 3 col. 5 lines 29-34).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 13 rejected under 35 U.S.C. 103(a) as being unpatentable over Su in view of Silberschatz et al (U.S. Patent 6,556,578 B1).

Regarding to claims 3 and 13, Su discloses all the limitation with respect to claim 1, except for the average is an exponential weighted moving average. However, Silberschatz discloses a method for managing a buffer pool containing a plurality of queues, wherein the measure of an average queue length is determined using an exponential weighted moving average (col. 2 lines 66-67). Thus, it would have been obvious to a person of ordinary skill in the art to employ an exponential weighted moving average as taught by Silberschatz in Su's system to allows the most recently collected data have more influence on the average than older ones.

Allowable Subject Matter

6. Claims 2 and 4-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed June 28, 2004 have been fully considered but they are not persuasive. Regarding to Applicant's argument on pages 5-8, Su fails to teach anything about service classes that can provide for packets. In response, on Fig. 4 col. 6 lines 49-67 and col. 7 lines 1-5, Su discloses a queue scheduler 211 for determining the service order of the queues 201, 203, 205, and 207 according to priority. Furthermore, Su discloses by defining a service order for the queues packets can be given a service or quality assignment. Thus, based on the reasons set forth the rejections are maintained.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2663

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
